Full Stack Web Developer

CAREER OBJECTIVE

I am a Software Engineering graduate from Jordan University of Science and Technology with a strong foundation in programming and OOP principles.

Currently, I am an intern at Orange Coding Academy, where I completed 900 hours of technical training and 100 hours of soft skills development.

I have successfully designed and delivered 7 integrated projects, gaining hands-on experience in both front-end and back-end development.

My technical skills include HTML, CSS, JavaScript, TypeScript, C#, ASP.NET Core MVC, ASP.NET Core API, and SQL Server.

I am a strong team player with a passion for continuous learning and collaboration.

I am familiar with Agile and Scrum methodologies and apply them effectively in project development.

I aim to leverage my experience to build innovative and efficient web solutions.

Technical Skills

Front-End: HTML/CSS, JavaScript, .NET Web Form , Bootstrap5, TypeScript, Angular.

Back-End: C#(OOP principles), ASP.NET Core MVC, Core API.

Database: SQL, SQL Server.

Software Development Practices(SDLC): Scrum, Agile.

Tools: Visual Studio, Visual Studio Code, Figma, Trello, GitHub ,Git.

Soft Skills

Software Development Requirements Analysis Critical Thinking Effective Communication Team Collaboration	Problem Solving Time Management
---	------------------------------------

Experience

Orange Coding Academy, Irbid/Jordan
Full Stack Web Development Trainee

Dec 2024 - Present

Work Experience:

- Currently engaged in an intensive full-stack development training program, gaining practical experience in both front-end and back-end technologies.
- Developing and maintaining dynamic web applications using HTML, CSS, JavaScript, C#, TypeScript, and ASP.NET Core MVC.

- Creating responsive and intuitive user interfaces with Bootstrap to ensure optimal performance across various devices.
- Efficiently managing and querying databases using SQL Server for streamlined data storage and retrieval.
- Working within Agile teams, actively contributing as a Scrum Master and Developer to deliver high-quality projects while adhering to Agile principles.

Projects

HR-Management-System ([GitHub](#))

I developed a human resources management system using ASP.NET Core MVC, with dashboards for employees, managers, and the HR department, including task management, attendance tracking, and leave requests. I contributed to password encryption, voice search, registration and login, the admin dashboard, and email notifications for a team of six, following Agile practices.

Candy-Sweets, Project-Angular ([GitHub](#))

This project is an e-commerce web application using HTML, CSS, TypeScript, Bootstrap 5, and Angular. On the user side: Users can register, log in, browse categories, add products to their cart, and pay via credit card or Orange Money. They can also write reviews, track orders, and apply discount coupons. On the administration side: Administrators can manage products, categories, and users, and create/edit coupons. The application includes voice search, content sharing on Facebook and other social media platforms, and the website is responsive.

Library System ([GitHub](#))

Designed and developed a library management system using ASP.NET WebForms, HTML, CSS, Bootstrap, and JavaScript, featuring book search, reservations, borrowing, study room bookings, and an admin dashboard. As a Scrum Master and Developer, I led Agile workflows, managed challenges, and ensured smooth execution. Utilized Figma for design and Trello for project management, enhancing my skills in full-stack development and project management.

Testing Platform ([GitHub](#))

Developed an online testing platform using HTML, CSS, and JavaScript with a secure login, user profiles, and three test types: IQ, English, and Technical. Integrated anti-cheating measures, countdown timers, and detailed results analysis. Applied Agile methodologies to enhance user experience, adding downloadable PDF results and interactive rubrics. Strengthened front-end skills, problem-solving, and teamwork under expert guidance at Orange Coding Academy.

Education

- Full Stack Web Development Bootcamp – Orange Coding Academy (Dec 2024 – Present)
Intensive course in Full Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT).
- Bachelor of Software Engineering University of Science and Technology

Courses and Certificates

- Asp.net core 7 with C# from Coderz ([Certificate](#))
 - Web development using asp.net core from Al-Raja International Company ([Certificate](#))
-
